human-i-t

IT Asset & E-Waste
Repurposing

→ Handling your tech professionally, responsibly, and ethically

At Human-i-t, we make sure your technology is taken care of properly. We ensure simple logistics, comprehensive reporting, and secure data destruction. When you donate your technology to human-I-T, not only is it treated with care, but it is also repurposed to help families in need gain access to computers, internet, & training, while keeping it out of landfills.

Your Donation's
Journey

→ See how your technology
will live a second life

1 Submit Your Request

Guaranteed responses within
1 business day.

2 Logistics & Services

Your donation is assessed to
determine which logistical option
is best and we advise next steps.

3 Arrival & Processing

Devices are data wiped,
inventoried, and refurbished.

4 Repurposing & Recycling

Devices are refurbished and
distributed to students, veterans,
families in need, nonprofits & more.

Items that are unsuitable for
refurbishment are responsibly
recycled via a R2 certified
downstream.

Helping The Community

Your desktops, laptops, and tablets help
students and families in need gain access
to the digital world.

Enterprise grade technology, like servers
and office phones, are resold and used to
provide internet connectivity and training.

Computers and internet access empower
recipients to complete homework, apply to
schools and jobs, access healthcare, and
much more.

Helping The Environment

Dumping technology in our landfills leads
to metals and chemicals contaminating
the soil, groundwater, and air, often in
developing countries.

It takes over 500 pounds of fossil fuel to
manufacture just one computer.

Reusing a device is 25 times more
environmentally sustainable than recycling;
reducing the impact of manufacturing
& shipping new devices while keeping
e-Waste out of landfills.
